EXCELLENCE | QUALITY | SAFE CARE

Dermapen™ is an effective micro-needling device used widely by aesthetic practitioners across the world, offering improved treatment, comfort and excellent results for patients. Micro needling, also known as Collagen Induction Therapy (CIT) is a minimally invasive collagen treatment used for effective skin rejuvenation.

The Dermapen™ contains very fine needles that oscillate vertically at high frequency. The fine needles place controlled punctures in the top layer of skin, stimulating the body to produce new collagen and elastin. Dermapen™ treatment also stimulates 80% more topical nutrients to feed underlying skin cells, promoting more extensive rejuvenation thereby improving results.

The treatment, performed over a series of sessions, improves skin elasticity, texture, firmness and appearance. It can reduce wrinkles, fine lines, pores and scarring from conditions such as acne and chickenpox. It can also be used to improve the appearance of stretch marks.

Dermapen™ is particularly effective for improving fine lines around the eyes and the lips. Although often promoted as an effective facial rejuvenation technique, Dermapen™ can be used to improve skin areas anywhere on the body.

During the treatment patients can expect to feel minimal pain and discomfort with little or no bleeding. The skin will look slightly puffy for a short while afterwards but the recovery time with Dermapen™ is very fast and you should feel confident in your appearance and able to wear make-up within a couple of days.

The treatment is suitable for all skin types. A full consultation with a surgeon at LINIA will be required prior to treatment. The surgeon will

discuss with you the areas you would like treated, and the results you are wishing to achieve. A tailored session of treatments and a care plan can then be created to help you achieve the best result possible.

The number of treatment sessions required depends upon the problem area you wish to improve.

Dermapen™ – effective treatment for:

- Improving fine lines and wrinkles, especially around the eyes and the lips
- Skin tone and texture
- Pigmentation
- Firmness and radiance
- Helps reduce skin pores
- Improving appearance of scarring from burns or surgery
- Reducing stretch marks

Benefits of Dermapen™ at LINIA:

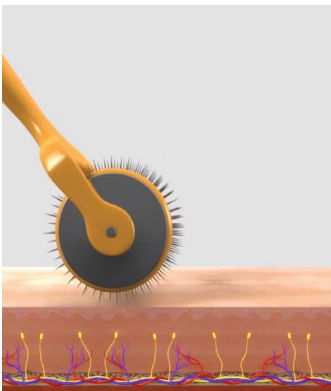

- Administered by a cosmetic surgeon
- Minimally invasive treatment
- Fast recovery with no scarring
- Minimal pain and discomfort
- Visible improvements over a series of sessions

Dermapen 3™

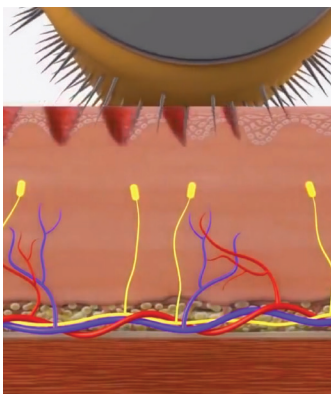

Derma Roller v Dermapen™

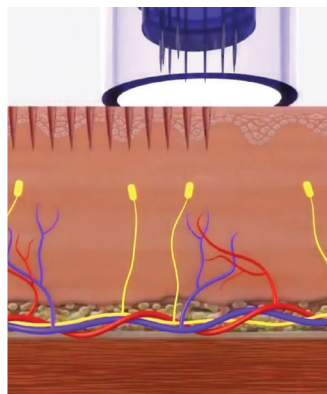

DERMA ROLLER ON SKIN

DERMAPEN™ ON SKIN

DERMA ROLLER IS A PAINFUL PROCESS WITH MORE BLEEDING DUE TO EPIDERMAL DAMAGE

DERMAPEN™ MINIMISES EPIDERMAL DAMAGE WHICH MEANS LESS PAIN AND BLEEDING

Post-Treatment Information

During the skin healing process, minor itching, flaking or redness may appear. If symptoms persist, please call us.

Please avoid the following activities for up to two days following a Dermapen clinical procedure:

- Direct UV exposure
- Intensive cardio
- Excessively hot showers
- Further clinical treatments including microdermabrasion, laser, IPL, chemical peels, dermal fillers
- Spray or self-tanning
- Swimming in chlorine pools or the ocean
- Tattooing (including cosmetic tattooing)

Light oil-free make up may be applied 24 hours post-procedure. If you are in any doubt about any of the above activities, please call us for clarification.
